PERSONAL PROJECTS

- Resume Builder 🌐 Live Demo
Create and download professional resumes with customizable templates.
 - Tools & technologies used: **React**
 - Designed and developed a web-based application that empowers users to effortlessly create professional resumes.
 - The platform offers a variety of resume templates, enabling users to select a layout that best suits their needs.
 - Users can input their personal and professional details, including contact information, work experience, education, skills, and more.
 - The application then generates a high-quality, downloadable resume in PDF format.
- WeatherCast 🌐 Live Demo
Real-time weather information for any location
 - Tools & technologies used: **React, OpenWeatherMap API**
 - Created a user-friendly web application that provides real-time weather information for different locations.
 - WeatherCast integrates the OpenWeatherMap API, allowing users to search for the weather conditions in specific areas, including temperature, humidity, wind speed, and the "feels like" temperature
